

# SEYI ABOLARIN

INFORMATION MANAGEMENT | MEAL | COORDINATION | CAPACITY BUILDING | DIGITAL HEALTH SYSTEMS

Abuja, Nigeria | [seyiabolarin@outlook.com](mailto:seyiabolarin@outlook.com) | +2347031666261 | [My Portfolio](#)

## PROFESSIONAL PROFILE

Information management and MEAL professional across humanitarian response, public health and development programmes in Nigeria, with remote technical support to a programme in Ghana and Cameroon. Led national system design, development, deployment, training, use, and reporting across 17 states in Nigeria. Managed humanitarian beneficiary profiling, data quality, GIS and analytics. Current work covers integrated health and nutrition case-management systems, requirements, interoperability, UAT and data governance. Collaborates with government agencies, consortium partners, programme teams and developers to turn operational needs into usable systems and information products.

## KEY SKILLS AND CORE COMPETENCIES

**Systems:** District Health Information System (DHIS2), National Orphans and Vulnerable Children Management Information System (NOMIS), ActivityInfo, KoboToolbox/ODK, Lafiya Management Information System (LAMISplus), REDCap, Comcare, CPro; case management, referrals, APIs, requirements, functional specifications, UAT and data dictionaries.

**MEAL and data:** Results monitoring, assessments, beneficiary profiling, DQA, governance, security, indicators, data standards and partner coordination, logframe development, Theory of Change, impact evaluation.

**Analytics, Visualization, and GIS:** Power BI, R, Python, SQL/PostgreSQL, STATA, SPSS, Excel, Tableau, NVivo, Atlas.ti, ArcGIS and QGIS; dashboards, operational mapping and capacity building.

**Capacity Building:** Training and mentoring teams on data management, statistics, and epidemiological analysis

**Research and Publications:** Technical reports, peer-reviewed articles, Data Use Briefs, and Bulletins.

**Donor Experience:** USAID, CDC, DOD, ECHO, EU, FCDO, MSF

## SELECTED CAREER HIGHLIGHTS

- Led national deployment of NOMIS and configured the customized DHIS2 platform for OVC reporting among supported partners in 17 Nigerian states.
- Coordinated a 15-state OVC data-quality transition, recruiting, training and supervising more than 400 enumerators; trained more than 300 federal and state MEAL officers in analysis and visualization.
- Supported monthly HIV treatment/OVC partner harmonization reviews that increased data concurrence from 10% to 80%.
- Built automated Kobo-to-Power BI humanitarian reporting dashboard across all the Northeast and Northwest states; established DRC Nigeria's Data Management SOP.
- Led the development of the Commodity Tracking System and Common Registration Tool for all ECHO Consortium partners across Northeast and Northwest in Nigeria
- Led the capacity development of 100 staff across 10 supported ECHO Consortium partners in Northeast and Northwest Nigeria.

## PROFESSIONAL EXPERIENCE

Information Management Expert

Donor/programme exposure: ECHO

3iS (Information, Innovation and Impact) - ECHO SHIELDS Consortium, Nigeria | July 2026 - Present

- Lead requirements and functional design for integrated Nutrition Information System (INIS), Health Management Information System (HIMS), Commodity Tracking System (CTS), and customized DHIS2

reporting, mapping health and nutrition case-management, registration, referral, follow-up, commodity management, and reporting workflows.

- Translate programme and partner needs into functional specifications, user roles, data dictionaries, indicator definitions, validation rules, shared identifiers and API/data-exchange requirements with developers and subject-matter experts.
- Design interoperability requirements between SHIELDS systems and ActivityInfo, DHIS2, SORMAS and other external partner platforms (DRC, CARITAS, MDM, IMC), including secure field mapping and referral-data exchange.
- Coordinate UAT scenarios, issue logs and validation; incorporate consent, role-based access, confidentiality and data minimization into system design and governance.
- Develop Power BI information products; coordinate with consortium partners and government health stakeholders; support training, user documentation, deployment and continuous improvement.

### **Country Information Management Specialist/Profiling Coordinator - Nigeria**

**Donor/programme exposure: EU SPADS, ECHO, FCDO COMPASS, and MSF Donor Experience**

**Danish Refugee Council | January 2025 – July 2026**

**Additional assignment: Interim Consortium Information Management Specialist, ECHO Consortium | May - July 2026**

- Provided interim consortium IM leadership during a staffing transition; developed ActivityInfo collection and reporting tools and developed R-based cleaning, validation and deduplication scripts and workflows.
- Built Python scripts for beneficiary distribution lists and supported food security/nutrition vulnerability scoring, referral indicators and beneficiary targeting.
- Trained MEAL and programme teams across DRC, Solidarités International and IMPACT Initiatives on ActivityInfo system design, user management, scoring and R-ActivityInfo interoperability; documented systems and handed over to the incoming specialist.
- Led country-level humanitarian IM for economic recovery, cash assistance, protection, WASH, durable solutions, assessments and community feedback; built digital tools for vulnerability scoring, beneficiary profiling, post-distribution monitoring and service registration.
- Automated Kobo-to-Power BI programme dashboards across four states; produced fact sheets, geospatial maps and enumeration grids for targeting and operational decisions.
- Led IDP profiling and labour-market assessment exercises, including data collection design, quality controls and quantitative/qualitative analysis.
- Established the Nigeria Data Management SOP for standardized governance, integrity and security; trained staff and partners and represented DRC in migrant-survey technical coordination.
- Conducted advanced qualitative and quantitative analysis using Atlas.ti 25 and other analytical software to generate evidence that shaped programming and policy direction.
- Designed geospatial tools and datasets, including enumeration grids for Sokoto Town (EU SPAD Durable Solution) and maps for program sites, enhancing evidence-based planning and geographic targeting.
- Strengthened staff and partner capacity in data collection, analysis, and visualization through targeted training, mentoring, and continuous technical support.
- Coordinated strategic partnerships and technical representation, serving as DRC's focal point on the National Technical Committee for Nigeria's first-ever migrant survey led by IOM and EU, and collaborating with global actors such as JIPS to align with sector-wide standards.
- Championed data-driven decision-making by embedding robust information management practices into DRC's MEAL framework, supporting program monitoring, evaluation, learning, and adaptive management.
- Ensured data quality assurance through systematic checks, compliance frameworks, and secure databases, reinforcing trust in data for internal and external stakeholders.

## Data Analytics, Informatics and MEAL - four roles

Palladium – USAID Data.FI, Nigeria | Aug 2019 – Jan 2025

Donor/programme exposure: USAID/PEPFAR, CDC, DOD; FCDO technical support

Technical Advisor (January 2023 – January 2025)

Technical Specialist (August 2021 – January 2023)

Data Analyst (May 2020 – July 2021)

Data Use Assistant (August – October 2019)

- Led national NOMIS development and deployment and configured DHIS2 for OVC partner reporting across 17 states, including datasets, reporting and analytics products.
- Coordinated national OVC Situation Room meetings, interagency USAID/CDC/DOD reporting and data-quality reviews; streamlined DHIS2-to-DATIM data transfer and partner harmonization.
- Led 15-state OVC transition DQA and supervised 400+ enumerators; trained 300+ government M&E officers and supported data-use capacity across federal and state agencies.
- Led the data management team during the National Interagency Orphans and Vulnerable Children pilot survey activities across 6 states in Nigeria.
- Developed and managed the ArcGIS real-time dynamic Service Availability and Readiness Assessment (SARA) geospatial dashboard for Palladium IHP, used to track Health Facilities and clients across three states in Nigeria.
- Supported the set-up of the Emergency Operations Center for the COVID-19 response across 8 states in Nigeria.
- Developed automated PowerBI, DHIS2 and ArcGIS dashboards for OVC, HIV/AIDS, GBV, COVID-19 and facility performance; supported assessments in 584 facilities and 54 community-based organizations across 17 states.
- Developed data use briefs, monthly bulletins, and quarterly information products for our stakeholders.
- Provided four months of analytical technical support to Palladium's Ghana JET project during inception.
- Designed and implemented MEL frameworks to assess public health interventions in OVC, HIV/AIDS, TB, GBV, and COVID-19 programs across 17 USAID-supported states in Nigeria.

## CONSULTANCY EXPERIENCE

- **Data Analytics & Research Lead (consultancy), WHO Nigeria | February –June 2023.**  
Recruited, trained, and supervised 45 enumerators for Nigeria-Package of Essential Non-Communicable Disease Interventions (N-PEN) and Nigeria Hypertension Control Initiative (NHCI) post implementation evaluation work across three states (FCT, Kano, and Ogun), coordinated the translation, and transcription of the collected data, supported data cleaning, analysis, visualization, evaluation reporting, review, and dissemination.
- **Technical Consultant - GIS, Jhpiego USAID RISE | December 2019 - April 2020.**  
Conducted routine HIV/AIDS data quality assessment, verification, analysis, reporting, capacity building for community and facility staff, and provided continuous LAMIS electronic medical record troubleshooting across 61 facilities which resulted in a 98% weekly reporting rate.
- **Research Assistant, Jhpiego USAID MCSP/RMC | October 2016 - July 2018.**  
Supported qualitative interviews, REDCap collection, translation/transcription, analysis, and report writing.

## EDUCATION

- M.Sc. Biochemistry (Toxicology) – 60.1% (Top 3%) | University of Ilorin, Nigeria | 2016
- B.Sc. Biochemistry (Enzymology) – 2<sup>nd</sup> Class Upper Division (Top 5%) | University of Ilorin, Nigeria | 2011

## CERTIFICATIONS & TRAINING

- BSAFE – United Nations Department of Safety and Security (UNDSS)

2026

- America Red Cross – Emergency Preparedness – **disasterready.org** 2026
- Prevention of Sexual Exploitation and Abuse (PSEA) – **UNICEF** 2026
- Certified Project Development Professional Foundation – **PM4NGOs** 2024
- Level 3 International Award in Emergency First Aid at Work – **Highfield** 2022
- Level 3 International Hostile Environment Awareness Training (HEAT) – **Garda World** 2022
- DHIS2 Fundamentals – **University of Oslo** 2021
- Advanced Microsoft Power BI – **LinkedIn Learning** 2021
- Power BI Data Modelling with DAX – **LinkedIn Learning** 2021
- Cleaning, Transforming, and Prepping Your Data with Tableau Prep – **LinkedIn Learning** 2020
- Tableau Essential Training – **LinkedIn Learning** 2020
- Data Wrangling and Visualization in R with ggplot2 – **LinkedIn Learning** 2020
- Python for Data analysis and visualization – **LinkedIn Learning** 2020
- Incident Management System (tier 1) – **World Health Organization** 2019
- Public Health Interventions in Pandemics and Epidemics – **World Health Organization** 2019
- Fundamentals of Project Management – **Philanthropy University** 2019
- Choosing Data Collection Methods – **International Rescue Committee** 2019
- Data Analysis and Action Planning – **Switchboard** 2019
- MEAL in Emergency – **Catholic Relief Services** 2019

#### USAID, Johns Hopkins Bloomberg School of Public Health: Global Health eLearning Centre

- Data Quality 2019
- GIS Techniques M&E of HIV/AIDS and Related Programs 2019
- Population, Health, and Environment 2019
- Data Use for Program Managers 2018
- HIV Basic Biology, Epidemiology, and Prevention 2018
