

SEYI ABOLARIN

INFORMATION MANAGEMENT | MEAL | DATA ANALYTICS | GIS

Nigeria | seyiabolarin@hotmail.com | seyiabolarin.github.io

Professional profile

Information Management, Monitoring, Evaluation, Accountability and Learning (MEAL), Data Analytics and GIS professional working across humanitarian response, public health and development. Connects programme needs with information systems, reproducible analysis, operational mapping and practical data use. Experience includes national health-system deployment, consortium platforms, beneficiary targeting, research and assessments, reporting automation and capacity building.

Current experience

Information Management Professional

3iS · ECHO SHIELDS consortium | July 2026-present

Support programme implementation across Northeast and Northwest Nigeria, working with ACF, PUI, BOWDI, GHIV Africa and other ECHO consortium organisations serving displaced and vulnerable populations in hard-to-reach areas.

Custom systems development. Work closely with frontend and backend developers and a subject-matter expert to build INIS (Integrated Nutrition Information System), HMIS (Health Management Information System) and CTS (Commodity Tracking System) from scratch. The technology stack includes Node.js, Next.js and React Native for mobile applications.

Programme workflows and referrals. Translate health, nutrition and multipurpose cash assistance needs into registration, case-management, referral, follow-up and commodity-management workflows.

Requirements and interoperability. Develop functional specifications, user roles, data dictionaries, indicator definitions, validation rules and shared identifiers. Define API and data-exchange requirements with ActivityInfo, DHIS2, SORMAS and other partner platforms.

Testing, governance and adoption. Coordinate user acceptance testing, issue logs and validation with programme teams and developers. Incorporate consent, role-based access, confidentiality and data minimisation, and support documentation, training and deployment.

Core capabilities

Programme monitoring and evaluation; accountability and community feedback; assessment design; data quality and governance; systems requirements and UAT; case-management and referral workflows; APIs and interoperability; beneficiary targeting; GIS; partner coordination and training.

Technology and methods

ActivityInfo, KoboToolbox/ODK, DHIS2, NOMIS, Power BI, Python, R, SQL/PostgreSQL, ArcGIS, QGIS, CSPro, REDCap, Stata, SPSS, NVivo and ATLAS.ti. Current custom development collaboration: Node.js, Next.js and React Native.

HUMANITARIAN INFORMATION & MEAL

Country Information Management Specialist / Profiling Coordinator

Danish Refugee Council | January 2025-July 2026

Led information management across humanitarian sectors, including cash assistance, economic recovery, protection, WASH, health and nutrition, assessments, durable solutions and community feedback. Also served as Interim Consortium Information Management Specialist for the ECHO consortium, May-July 2026.

ECHO consortium platform and RRM support. Developed the ECHO consortium ActivityInfo platform and supported Rapid Response Mechanism (RRM) technical workflows. Built R cleaning and deduplication scripts connected to ActivityInfo to flag data inconsistencies and support data-quality review.

Beneficiary targeting and automation. Developed automated Python scripts to generate beneficiary distribution lists. Programmed and automated scoring criteria in Kobo tools to support consistent vulnerability assessment and beneficiary targeting.

Sector tools and accountability. Developed Crisis Modifier tools, multipurpose cash assistance (MPCA) tools, post-distribution monitoring tools and the Multi-Sectoral Needs Assessment (MSNA). Developed the community feedback mechanism to support accountability and programme follow-up.

Integrated reporting. Connected both ActivityInfo and Kobo directly to Power BI through APIs. Built dashboards for sector teams and management, with automated refresh scheduled every six hours, daily.

GIS and cross-country support. Produced geospatial reference maps, operational maps and enumeration grids for Nigeria. Supported DRC Cameroon by developing geospatial reference maps using ArcGIS and QGIS.

Profiling and assessments. Led IDP and host-community profiling and labour-market assessment work in Sokoto, including survey design, field quality controls, stakeholder coordination and quantitative and qualitative analysis.

Governance, coordination and capacity building. Established DRC Nigeria's Data Management SOP. Trained and supported staff and partners on ActivityInfo, collection design, scoring, analysis and visualisation; documented workflows and supported technical handover. Represented DRC in migrant-survey technical coordination.

Selected consultancy and research

WHO Nigeria | Data Analytics & Research Lead | February-June 2023

Supervised 45 enumerators supporting N-PEN and NHCI post-implementation evaluation in FCT, Kano and Ogun. Coordinated translation and transcription, data cleaning, analysis, visualisation, evaluation reporting and dissemination.

Jhpiego | USAID RISE | December 2019-April 2020

Technical consultancy supporting data quality, verification, analysis, reporting, staff capacity and LAMIS troubleshooting across 61 facilities.

Jhpiego | Research Assistant, USAID MCSP/RMC | October 2016-July 2018

Supported qualitative interviews, REDCap collection, translation, transcription, analysis and report writing.

NATIONAL SYSTEMS, ANALYTICS & DATA USE

Data Analytics, Informatics & MEAL

Palladium · USAID Data.FI | August 2019-January 2025

Progressed through Data Use Assistant (August-October 2019), Data Analyst (May 2020-July 2021), Technical Specialist (August 2021-January 2023) and Technical Advisor (January 2023-January 2025), supporting national health information systems, programme monitoring, analytics and government data use.

National information systems. Led NOMIS development and deployment and configured DHIS2 for OVC partner reporting across 17 Nigerian states, including datasets, reporting workflows and analytical products.

Coordination and data use. Coordinated National OVC Situation Room meetings, interagency USAID/CDC/DOD reporting and data-quality reviews. Streamlined DHIS2-to-DATIM transfer and supported partner harmonisation reviews.

Data quality and capacity building. Led the OVC transition data-quality assessment across 15 states and supervised more than 400 enumerators. Trained more than 300 government M&E officers in analysis, visualisation and data use, and supported development of the national OVC DQA protocol.

Surveys and assessment management. Led data management for the National Interagency OVC pilot survey across six states, including CSPro collection-tool development. Supported assessments involving 584 health facilities and 54 community-based organisations across 17 states.

GIS and response information. Developed and managed the ArcGIS Service Availability and Readiness Assessment (SARA) dashboard for Palladium IHP across three states. Supported COVID-19 Emergency Operations Centre setup across eight states and GIS-enabled vaccination and disease-response information products.

Analytics, automation and MEAL. Developed Power BI, DHIS2 and ArcGIS dashboards for OVC, HIV/AIDS, GBV, COVID-19 and facility performance. Designed and implemented MEL frameworks for public-health interventions and produced data-use briefs, monthly bulletins and quarterly information products.

Regional technical support. Provided four months of analytical technical support to Palladium's Ghana JET project during inception.

Education and selected training

M.Sc. Biochemistry (Toxicology), University of Ilorin, 2016. B.Sc. Biochemistry (Enzymology), University of Ilorin, 2011.

DHIS2 Fundamentals, University of Oslo (2021); Project Development Professional Foundation, PM4NGOs (2024); Data Quality, Global Health eLearning Centre (2019); HEAT, GardaWorld (2022).

Selected presentations

INSIGHT Learning Forum (2025); Health GIS Conference, University of Calgary (2024); NISA/GIS Conference (2024); IMPACT First Summit, Lisbon (2024); Digital and Data Use Forum (2024); Nigeria HIV Prevention Conference (2024).

Languages: English (fluent); French (basic).
